

Our farmstay program is to receive guest students not as customers but as family members. We would like you to understand the following points for more comfortable and fruitful farmstay.

1. For your school () families are already registered as hosts. Basically one family will host four students. Some families can receive only girls or boys.
2. Each family has different housing and life style, so the rooms and meals they can offer should vary.
3. There are cases in which we have to ask our guests to stay with families different from one's previously arranged due to unexpected inconveniences.
4. The host families regularly undergo trainings for assuring safety and security of their guests and disaster prevention. However, each family has different level of the knowledge and skills for caring about physical or mental difficulties.
For matching students with host families we take various factors into consideration therefore please be requested to give us enough information including their food allergy and any individual conditions to be noted.
5. The purpose of our stay program is to make good relationship with strangers, broaden their horizons through exposure to the famers' daily life and their cultural aspect. Please be requested to let your students understand this purpose.
